

MULTI CULTURAL WEEK AFRICAN INSTRUMENTS YEAR 4

To celebrate multicultural week in Year 4, we studied traditional African instruments. We recreated 2d/ 3d models of drums, rattles, shakers, flutes and other string instruments like the long-necked harp. African drums come in different sizes and are usually made from wood, metal and earthenware. Different materials like cardboard, paper, cup, straws, bottles, seeds, strings and glue were used to give it the correct shape and texture. The most enjoyable part of it all was painting the instruments and then getting them to work.
