

19th March 2018

Dear Parents/Carers,

I'm writing to advise that a small number of Montem Academy children have been diagnosed with suspected scarlet fever.

As a result we have been in contact with Public Health England to obtain further information about this usually mild illness.

Please see overleaf and attached the information that they have sent to us in connection with suspected scarlet fever.

I would advise that you contact your local GP or contact NHS 111 as soon as possible if you suspect (based on the facts given to us by Public Health England) that your child has scarlet fever.

Yours sincerely

Ms A. Probert
Executive Principal
